EXPERIENCE

Senior Software Engineer

EXCELERAS LLC (Chicago, Illinois) January 2023 – October 2024

- Developed and implemented high-priority features for a SaaS-based REO Servicing application, including integrations with third-party vendors, driving business value across diverse customer segments.
- Led a project to successfully expand the reach of our modern Angular codebase to replace older VB ASP.NET code used by existing customers.
- Collaborated with stakeholders to sequence user stories, accounting for critical-path tasks and chains of dependencies, and to allocate resources to ensure project completion within a tight timeline.
- Leveraged cross-team communication and collaboration skills with fellow developers, QA, and product teams, often assuming the role of a project manager, to ensure alignment on feature enhancements.
- Led efforts to upgrade the company's coding practices and developer experience, including promoting and teaching about Git version control, and promoting better code review practices.

Engineering Manager, Business Platform Team

AMOUNT (Chicago, Illinois) April 2021 – June 2022

- Promoted to team manager for skills in team management and facilitation while acting above and beyond in my role on the Avant Mobile Team.
- Led and mentored a team of junior engineers, driving incremental improvements and modernizing code to the company's back-office suite of applications, written in Node.js, React, Typescript, Ruby on Rails, and Express.js.
- Evaluated contract-to-hire engineers. Set performance expectations and directed their contributions to the team.
- Empowered engineers to expand their technical skill sets by guiding frontend developers into backend development with Ruby on Rails, fostering career growth and cross-functional expertise.
- Streamlined collaboration between engineering and business teams, ensuring more efficient feature releases by creating release notes and a system for creating those artifacts.
- Led a strategic initiative to tackle five years' worth of accumulated tech debt by maintaining a structured backlog, implementing best practices, and developing detailed technical documentation to improve onboarding and knowledge sharing.

Senior Associate Engineer, Avant Mobile Team

AMOUNT (Chicago, Illinois) May 2019 – April 2021

- Adapted quickly to a new tech stack, contributing production-level code within weeks despite having no prior experience with TypeScript, React, or GraphQL.
- Independently developed and tested a critical feature enabling credit card payments for loan products on the mobile app, overcoming compliance challenges by designing a secure bypass around non-PCI-compliant systems.

Senior Technical Consultant

SOLSTICE (Chicago, Illinois) July 2013 – May 2019

- Led a team of developers to design and implement a PCF SpringBoot API to support a customer service chatbot "Discover Virtual Assistant" for Discover Financial Services.
- Developed Android prototype and version one of the Momentum app for Fifth Third Bank.
- Mentored junior developers and acted as primary developer and QA for the BMW Connected car-connectivity application for BMW, featured in the 2017 CES show in Las Vegas.
- Managed a team of junior Android and iOS developers to develop from greenfield the MyOperations app for John Deere. Architected a mock API embedded in the app to continue team velocity when dependent services were unavailable.
- Developed money transfer, photo check deposit, and push notification features for the Android side of Private Passport, the customer banking application for The Northern Trust.
- Earned the AWS Solutions Architect - Associate, Professional certifications in 2016.

Software Developer

SAFELITE AUTOGLASS (Columbus, Ohio) February 2010 – April 2013

- Developed features for Mobile Blackberry/Android application for mobile service technicians, including push messaging, PCI-compliant credit card authorization, smooth-stroke signature capture, before those were commonly available libraries.

EDUCATION

OHIO STATE UNIVERSITY, Columbus, Ohio

B.S., Electrical & Computer Engineering, 2009
